PRODUCT DATA

CORN CONDENSED DISTILLERS SOLUBLES

Corn Condensed Distillers Solubles (CCDS) is a palatable, free-flowing, energy and protein source for cattle.

CCDS is a product from the fermentation to ethanol of corn starch produced by the Corn Wet Milling process. All process additives and product ingredients meet FOOD CHEMICALS CODEX SPECIFICATIONS.

TYPICAL COMPOSITION (% EXCEPT AS INDICATED)

Moisture **48.0**

APPLICATIONS

Corn Condensed Distillers Solubles is an attractive ingredient to use in cattle feeding, alone or blended with molasses or other liquid feed ingredients. Because of its high energy content, natural protein and palatability, CCDS fits into a large number of feeding programs. It remains fluid in a wide range of temperatures, mixes well with silage or dry feeds, and is ideal for use in lick tanks or similar equipment.

PACKAGING

Tank car, tank truck
